

Free energy from the Sun

Solar Ray's new modern design of solar water heating systems will add value to your home and save you money every month!

The Solar Ray split system's next generation technology is engineered to maximise solar absorption and increase energy efficiency.

- High efficiency evacuated tubes with frost protection down to -12 deg C
- Excellent cold weather performance
- Lightweight roof mounted components
- On cloudy days or during heavy usage, the electric booster automatically "tops up" the hot water supply
